České akademické časopisy se stanoviskem k umělé inteligenci

Biologia Plantarum
Vydavatel: Ústav experimentální botaniky AV ČR

https://bp.ueb.cas.cz/artkey/inf-990000-0200_For-Authors.php

Postoj k užití AI v akademických rukopisech:

Use of artificial intelligence (AI) tools

„The use of AI tools for any other purpose than language corrections in existing texts has to be adequately described in the Methods section. Use of texts generated by AI software and/or the listing of an AI program as a co-author is not permitted, because an AI cannot take responsibility for the content and integrity of a scientific paper, as expected from the authors."

Folia Parasitologica
Vydavatel: Parazitologický ústav, Biologické centrum AV ČR

https://folia.paru.cas.cz/artkey/inf-990000-2300_Preparation_of_manuscripts.php

Postoj k užití AI v akademických rukopisech:

THE USE OF GENERATIVE AI AND AI-SUPPORTED TECHNOLOGIES

„AI and AI-assisted technologies may only be used when writing texts to improve the readability and language of the authors' work. AI technologies must not replace important tasks such as drawing scientific conclusions or preparing a draft manuscript. Authors are ultimately responsible for the content and accuracy of their work. The use of AI or AI-assisted technologies is permitted in data collection and analysis, provided their use is properly described in the Materials and Methods section. The use of AI or AI-assisted technologies **to create or modify scientific images is not permitted** (with the exception of corrections to brightness, contrast or colour balance, as is common with standard image or photo editors). Authors should disclose the use of AI and AI-assisted technologies in their cover letter to the editor, and if they are used for a purpose other than a language check, they should also disclose this in a statement that will appear in the published paper."

New Perspectives
Vydavatel: Ústav mezinárodních vztahů Praha

https://us.sagepub.com/en-us/nam/new-perspectives/journal203689#submission-guidelines

Postoj k užití AI v akademických rukopisech

„Please note that AI chatbots, for example ChatGPT, should not be listed as authors. For more *information see the policy on Use of ChatGPT and generative AI tools*."

Přehled výzkumů

Vydavatel: Ústav archeologie AV ČR

https://www.arub.cz/en/prehled-vyzkumu/about-journal/

Postoj k užití AI v akademických rukopisech:

„*Declaration of generative AI in scientific writing – Where authors use generative artificial intelligence (AI) and AI-assisted technologies in the writing process, authors should only use these technologies to improve readability and language. Applying the technology should be done with human oversight and control, and authors should carefully review and edit the result, as AI can generate authoritative-sounding output that can be incorrect, incomplete or biased. AI and AI-assisted technologies should not be listed as an author or co-author, or be cited as an author. Authorship implies responsibilities and tasks that can only be attributed to and performed by humans. Authors must disclose the use of generative AI and AI-assisted technologies in the writing process by adding a statement at the end of their manuscript in the core manuscript file, before the References list. The statement should be placed in a new section entitled 'Declaration of Generative AI and AI-assisted technologies in the writing process'.*
Statement: During the preparation of this work the author(s) used [NAME TOOL / SERVICE] in order to [REASON]. After using this tool/service, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the publication.

This declaration does not apply to the use of basic tools for checking grammar, spelling, references etc. If there is nothing to disclose, there is no need to add a statement."

Czech Academy of Agriculture Sciences Journals:

Postoj k užití AI v akademických rukopisech platný pro všechny akademické časopisy vydávané Czech Academy of Agriculture Sciences:

„*Text generated from AI, machine learning, or similar algorithmic tools is not used in the manuscript, nor the accompanying figures, images, or graphics are the products of such tools.*"
